16 March 2016

Dear Miss Kershaw

This report outlines your patient feedback from the Improving Practice Questionnaire (IPQ). Your results have been illustrated in tables and graphs with associated benchmarks where applicable. Details of score calculation and statistical methods have been provided to help you in the interpretation and understanding of your results. You will also receive an A4 poster summarising your results and a certificate of completion which you may like to display to patients to indicate that you value their views in order to inform positive change within your practice.

A guidance template for discussion of these local survey findings and an action plan have also been included which may help facilitate discussions with your patient reference group (PRG).

The format of this report has been updated, which we hope will provide you with a clearer picture of performance.

We hope these results give you useful feedback as to how patients rated the practice and its service, and provide you with a basis for reflection. In order to enable us to improve our services we would be grateful if you could complete a feedback form using the following link:

<http://www.cfepsurveys.co.uk/questionnaires/feedback/default.aspx?psid=190407>

Please contact the office on 01392 823766 or reports@cfepsurveys.co.uk if you require further information about your report.

Yours sincerely

CFEP UK Reports Team

Introduction

About the IPQ

The IPQ is a well-established questionnaire widely used in the UK.

Since 2004, over 3,000,000 patients have completed an IPQ providing valuable patient feedback to over 4,000 practices and over 16,000 health practitioners, many of these practices and health practitioners having completed the survey on more than one occasion.

Extensive published validation studies have established that the IPQ is a reliable and sensitive tool: accurately measuring patient satisfaction in designated areas and is sensitive to change - if the IPQ is carried out on more than one occasion any change in patient perception of service can be clearly and reliably monitored.

This report outlines the feedback that has been collected and analysed from a sample of your patients. Full explanation on how to interpret this information can be found in the report. We hope that this feedback is useful and a basis for reflection.

A sample of the IPQ questionnaire is included at the end of this report for reference.

About the benchmarks

Benchmarks are a useful guide as to how your practice performed in relation to all the practices who have carried out an IPQ survey. Benchmark data provided relates to either all practices or according to practice list size (the practice list size benchmarks displayed in this report are representative of your practice), as we have established this plays a part in scores achieved. However, it should be noted that other factors such as geographical location and clinical setting may also affect scores and benchmarks may not always be truly representative. Furthermore as it is not mandatory for a practice to carry out an IPQ survey, benchmarks provided are effectively based on data collected from a *volunteer* sample. Volunteer samples often perform better than an 'average' sample which could make the benchmarks provided artificially high.

Your feedback

From the report you will be able to clearly pinpoint areas where you scored well and also those areas where you might feel that improvements may be needed. However, it is advisable to take time to assimilate all the feedback and to avoid scanning the report and noting specific scores on which too much emphasis can be placed. In fact, the clearest reflection of patient satisfaction can often be seen in the frequency and distribution of patient ratings and in their written comments.

A page by page guide to the interpretation of your report has been incorporated in the supporting documentation at the end of this report which you may find useful.

Other useful information

Together with your report you will receive:

- An A4 poster: to enable you to share the results of your local survey with the patients in your practice.
- A 'Guidance template for discussion of local findings and action plan' to help you reflect on the survey results.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- Better opening hours and ability to book online and beyond 48 hours in advance.
- I think everyone is trying so hard despite the volume of patients, demands and stress put upon yourselves. Thank you.
- It is brilliant.
- Rubbish service for trying to see a doctor tried from opening time only one nurse appointment left. Very hard to come as working tried to get in sit and wait no luck tried to get in to see doctor for two days, nothing, it is a doctors and almost impossible to see one. It was my husband but I rung for appointment.
- Full trained staff and get more training.
- None at all - as a visitor to Merridale to see nurse specialist. I do not feel Merridale could be any better.
- Open surgery hours, should be open on Saturday and evenings.
- Appointment booking service is very poor. Often appointments are not available (even if called at 8.30am). Pre book system also is very weak.
- Nothing, absolutely great compared to my last doctors.
- Appointments are very hard to obtain with a GP and you never get to see same GP.
- More bookable appointments on the internet.
- Prescriptions open longer but wonderful reception staff who made sure I still got my prescription very grateful.
- Yes when a female comes in for smear test the nurse could let the patient relax more instead of just roughly putting the plastic instrument inside causing bleeding this is what I have experienced in the past. Hope it will be different today!
- Waiting time when phoning at 8.00 for a same day appointment. Better system, have just done my paperwork to do online but do feel that you should be able to speak to reception.
- The practice is excellent. Very supportive and friendly staff.
- Service is excellent in all the years I been coming here. Reception staff always happy smiling and happy to help.
- I find it hard to get through on the phone sometimes.
- Sort out an easily understood and speedy appointment system. Ensure computers allow appointments to be made more than one month in advance.
- Leave the appointment making procedure the way it is now - 8am. The recent change and then back again was a little irritating. Information about changes would have helped instead of finding out at the time of trying to make an appointment and then having to come back.
- Please make it easier to have an appointment on the day or day after - by phone, not driving all the way there to have to do it.
- A better appointment system - have old style waiting service for workers and some evenings. System not flexible enough!
- Find out more about how people on a low income can get help with prescriptions.
- Not towards myself.
- Free Wi-Fi, ha ha.
- Booking system could be better - on the phone 20 minutes this morning.
- Free Wi-Fi, water machine.
- No complaints, very good, happy with service.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- For working people, the difficulty in "collection of prescriptions" could be improved. Even more people now work weekends.
- Every time I have rang to make an appointment for either myself or son has been a nightmare to get through at any time of the day. Once I rang 28 times in one day!
- Lessen the waiting time.
- Seem at times overstretched but still always polite and helpful.
- Re Q5 - When phoning for same day appointment, they don't tell you who you will see (they say they don't tell patients - very bizarre) and also even if you specifically request to see a doctor, they will offer you a time normally to see a nurse practitioner, but they don't tell you this, you have to check and then explain again why it needs to be a doctor. Q2 - When eventually you are at front of phone queue I have had the phone ring out your end over 50 rings before picked up. Q6 - Only if you really push this hard.
- One of the doctors is very nice doctor. Plus she help me with my problem.
- I would like to book appointment by telephone all day (in working hours) and in reception all day (in working hours).
- To be able to pre-book appointment longer in advance than 2 weeks. For example to be able to book an appointment for a month's time.
- To get through the phones to book an appointment for same day is virtually impossible.
- Not happy with service, staff unfriendly and arrogant. Maybe re-train on people skills and care for others.
- Have another line. Have more pre-bookables available. More appointments available. Maybe open until later.
- Being able to book with the same doctor made more easier. The way bookings are completed (48 hours etc) not simple procedure.
- I've been unable to answer a few of the questions due to not regularly needing to use the services, but each time I have come all has been good.
- Final section is good because I have not been in a situation where I had to complain but overall the experience was amazing.
- The reception staff can be rude at times. They often misinform about appointments, how in advance they can be made, then when called to make an appointment they then give other advice. Clear message/advice required.
- Yes, we find very hard to get appointment with this doctor. Get some more new female doctor to easy for all the ladies to talk easy ladies problem.
- Better phone service - the waiting times can be very bad sometimes if you don't call at the right time.
- Having problem calling the surgery, because patient doesn't have any minutes on the mobile.
- Not being able to see a doctor on the day you ring up could be improved. Some people may not be able to wait 48 hours.
- It's very difficult to get an appointment with a doctor so maybe increasing the amount of appointments you can book with a doctor can help.
- Telephone appointment system. I have had to call two mornings at 8am and been on hold for 40 minutes to be told all appointments with doctor have gone, before I finally got an appointment with a locum. I was also disconnected twice during this as well. I was unable to book in with the GP who looks after my current health issue which is disappointing.
- I feel it is very difficult to make an appointment with GP. This one I only had because health visitor made it for me, even though I have been trying to do it myself I couldn't get one (I have been trying for 2 weeks). Maybe practice could have GP who will be seeing patient on sit and wait basis to see patients on the day as well as nurse practitioner who is available on the day.
- I would like to have the same GP on at least all my visits. Obviously on day off and holidays it's not possible. But would prefer to see the same GP. I think that way the GP will know you etc.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- More online appointments. More chances of seeing doctor.
- Telephone service is very poor. Can't get appointment as you want and the doctor we want.
- I been to this doctors millions of times never been treated as well as I did today. This doctor is fantastic.
- Allowing us to choose which doctor we see.
- The online system and phone service.
- Took me 3 days to get to see a doctor.
- The lady in one room is very good.
- Want doctor not a nurse!
- Sometimes when a doctor of your choice asks you make an appointment to see them in e.g. 2-3 weeks the staff are not massively forthcoming and you are made to feel rather like an unimportant person and just wasting their time. Obviously if the relevant doctor asks you to make this booking then why does it become such a task!!
- Appointments, appointments.
- Improve your appointment system.
- Reception staff listen to patient. I was told by a doctor at walk in centre I needed to see my GP but the reception staff would only book me to see NP wasting everyone's time, I was sent straight back to waiting room and had to wait another hour for an appointment with a GP.
- Never see same person twice, I stay at practice because of the relationship I have with one of the doctors but never manage to see her anymore.
- There is a nurse in this practice that could find another job as they are rude, doesn't listen to their patients and always have a "I don't know" as an answer. This practice need more doctors!!
- Could we book doctor appointment online please.
- Same day appointments would be great with doctor not nurse especially urgent health concerns - feel doctors know better than nurse.
- Most of the time I find the patient toilet one in the reception was not clean. Needs to be clean at least every 2 hours please.
- Maybe put some heating on in the waiting area, was a bit chilly. Maybe form some sort of queuing system in the pharmacy. When it gets so busy people do their best to jump the queue which is wrong.
- Too many patients and can't get to see a doctor who knows you.
- Telephones.
- Automatic doors accessing the corridors please.
- Telephone system, cannot get through. More doctors so more appointments.
- Being able to book an appointment more than 2 working days in advance. It took me 3 weeks of ringing at 8am to get my daughter a follow up appointment that the doctor had asked me to do after 6 weeks!!
- Unhappy to make an appointment from 8.00am to see a doctor. It took 45 mins two days ago.
- Trying to ring for an appointment is enough to make you weep. I myself spent one hour before I actually got through. Blue badge parking is not always possible as people coming to the chemist park outside or in the blue badge spot.
- Phone system - wait ages to get through by which time appointments have gone. Object to being asked what problem is. Prescription time - stupid - non workable for working patients and get rid of patients who do not attend appointments.
- Cannot see doctor. Still give you more nurses.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- Better appointment system - it makes it difficult to bother coming to GP when ill.
- The telephone need to be checked if you are hard of hearing it's difficult to hear what number to press and then it's rather a long wait.
- More doctors or fewer patients!
- Would like to see many more appointments available online currently it's very poor.
- Getting an appointment with doctor needs to be vastly improved and would be nice to see doctor of your choice. You call 2 days in advance and still cannot get appointment.
- More bass in the speakers.
- Have more GPs urgently.
- Not enough GPs, more patient care.
- The 'clocking-in' panel on the wall. For inserting month of birth etc, sometimes does not work in recognising me, so I ask the receptionist.
- The appointments are very hard to get and old people can't stand outside at 7.30 to make an appointment so they have to rely on others to make an appointment. The choice to see my chosen doctor is very poor.
- Telephone appointment delays to be improved.
- The staff being understanding.
- I am not happy at all about the reception because when I came to make appointment for my family reception staff always give me reason they never give me a chance to see a doctor.
- No comments at all.
- Telephone booking isn't good. I would rather see the doctor who originally treated me but couldn't until I went on the online booking at 2.00am at work. Although I was told to book at reception first only to be told this was incorrect.
- Keep it up!
- God help the NHS!
- Need a full time diabetic nurse.
- Phones.
- More availability of appointments to see GP.
- Give an opportunity to make an appointment more than 48 hours in advance.
- More communication regarding repeat prescriptions especially if it is to be refused/delayed. I had to find out from the hospital.
- Phones.
- The service at the chemist shop at the surgery needs to be improved. Also at the reception service needs a bit of improvement sometime you get cut off or you have to wait for ages.
- More men's magazines, FHM, football magazines, Mayfair, Penthouse, comics!
- I don't know, the problems lay outside this practice, with the pressures being put on with the amount of people using the service.
- More appointments and more phone lines - being number 27 on the phone is unacceptable!
- Patient saying why can they not book doctor week ahead. Patient saying why should I come twice one day to make a doctor appointment. If they come in today, they want to make doctor appointment next week.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- Improved telephone system?
- Can never get an appointment with one of the doctors.
- Change the sit and waits. Rubbish!!
- Sort out phone appointments. Takes a long time to get through and by 8am most appointments have gone. I hate the phone system. Prescription times are no use to people who work!
- Phone system doesn't connect when busy.
- Very poor appointment system.
- Under difficulties that arise very capable even some of us (of my family) can be complicated in our requests.
- Too many people are not attending their appointments. In my opinion they should be fined like the dentist does. It's really annoying that someone else could have had their appointment.
- Wish you could make an appointment further ahead than 2 days took me 3 attempts to get an appointment.
- Don't change the rules of the practice every other week.
- Not having to wait outside in bad weather to let patients in and wait until 8am.
- Nothing to add.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how the doctor/nurse could improve?

- Very good.
- Full trained staff and get more training.
- None at all - thanks to all.
- Locum doctors to have more access to patient files.
- Very warm and welcoming person. However fact that for all prescriptions she has to check books are a bit worrying sometimes as confidence reduces.
- Doctors when you get to see them are excellent.
- The doctor I based this on was excellent and really made me feel at ease. Also had a blood test done and that practitioner was lovely.
- This doctor always gives 100%.
- No. This doctor is excellent. The best GP I have ever known.
- No. The doctor was fantastic - informative and very helpful.
- Better knowledge of patients - too much retrieval of information - doctor should see the same patients if possible.
- No very happy with this doctor.
- Don't rush the appointment.
- No complaint. Very good.
- All doctors I have seen have been very good and treated me and my son as individual people not just another patient.
- Doctors are very good, friendly and professional. Some of the nurses are very good but there's one or two that come across very unfriendly.
- Doing brilliant.
- He is brilliant.
- Doctors and nurses are generally very helpful.
- No this doctor is a brilliant doctor and really cares about his patients.
- This doctor is brilliant, always listens and very thorough. Brilliant at her job.
- Get some more new doctors we can see on same day. If we want see doctor we have to wait for 3 or 4 days is not nice.
- Perfect. In the past some doctors I have seen haven't been as compassionate or willing to help. But recently that's been different.
- I know this person has many patients but it would be nice if she expressed concern or to care about my well being. Also giving practical and proper advice would be nice and not just fobbing off my feelings/symptoms to stress.
- They were fantastic.
- In order to see GP in my own practice I have to wait over 2 weeks if I were to book it myself or I am being sent to hospital which in my opinion shouldn't be an option if it's within opening hours of my practice. Doctor - more time and consideration for the doctor I didn't have 10 min appointment, I have been asked to dress baby in the waiting area. We have left room just in the nappy dressed baby.
- Satisfied at the moment.
- Have more time for patient.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how the doctor/nurse could improve?

- Open in the evening.
- Carry on helping.
- Smile, be warmer.
- The doctors are really good, professional and helpful but I can't ever see them when I need them. I have been trying for months to see a doctor for my continuous menstruation pains irregular bleeding and feeling unwell. They think (receptionists?) is not important and keep saying "ring tomorrow" we have no GPs available. Very sad.
- Friendly manners is always grateful and greeting when entering room is always comforting.
- Was very pleased with one of the doctors, she was so lovely. Was very clear and had time for us both. She didn't spend 90% of the time looking at the computer!
- Personal level.
- The doctor I saw was excellent. 10 out of 10 in fact could be more. Her explanation was just what I needed.
- No all very good.
- No complaints whatever. It's sometimes a nice surprise to be called in earlier than the stated time - very good.
- The doctors are the best I have no issue with the doctors.
- No comments at all.
- This doctor is first rate my doctor of preference when I try to book.
- God help the GPs.
- Doing great.
- The same doctor being seen to create better professional relationships.
- Keep doing what you are doing now!
- No. They are all excellent and do a great job in very difficult times, under great pressure. Thank you!
- Be able to discuss more than one problem.
- Very good visit. Thank you.
- Warmer. Friendly. Caring. Charismatic. Overall very monotone and didn't seem to want to speak, only enough to do her job.
- She could have looked at me when talking to me, or even pretended to be interested.
- I am on medication and I always have problems, time and amount.
- One of the doctors is lovely.

Details of score calculation

The score provided for each question in this questionnaire is the mean (average) value of all of the ratings from all patients who completed the question. It is expressed as a percentage - so the best possible score is 100%.

Example using data from your Q1 Opening hours satisfaction

Total number of patients responses = 333

Questionnaire rating scale	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Number of ratings	9	36	109	110	64	5

Value assigned to each rating	0	25	50	75	100	n/a

$$\frac{\begin{aligned} &(\text{number of Poor ratings} \times 0) + (\text{number of Fair ratings} \times 25) \\ &+ (\text{number of Good ratings} \times 50) + (\text{number of Very Good ratings} \times 75) + (\text{number of Excellent ratings} \times 100) \end{aligned}}{\begin{aligned} &(\text{Total number of patient responses} - \text{number of blank/spoilt}) \end{aligned}} = \frac{(9 \times 0) + (36 \times 25) + (109 \times 50) + (110 \times 75) + (64 \times 100)}{(333 - 5)} = 21,000/328$$

Your mean percentage score for Q1 = 64%

Explanation of quartiles

In statistics a quartile is any one of the three values that divide data into four equal parts, each part represents ¼ of the sampled population.

Quartiles comprise:

Lower quartile, below which lies the lowest 25% of the data

The median, cuts the data set in half

Upper quartile, above which lies the top 25% of the data

Please note that the benchmarks presented in this report are based on data obtained from a volunteer sample of practices, and as such may be artificially high.

Question	Your mean score (%)
Q1 Opening hours satisfaction	64

Benchmark data (%)*				
Min	Lower quartile	Median	Upper quartile	Max
23	64	68	73	92

9541

*Based on data from 927 practices carrying out 1,326 surveys between April 2010 and March 2013 with 25 or more responses.

Supporting documents

Page by page guide to the interpretation of your report

Page 1

The frequency distribution table (table 1) shows the number of patient ratings from poor to excellent and the number of 'blank/spoilt' responses for every question (a blank response is where a patient did not respond to the question and a spoilt response is where more than one tick box option was chosen or if the questionnaire was defaced). If these values are added up, for any one question, this will equate to the total number of patients surveyed (shown in the top right hand corner of the page). This table clearly shows the degree of satisfaction patients have with each aspect of the practice considered. Please note the spread of the ratings. Are they widely spread or closely packed around one or two specific ratings? One or two higher or lower ratings can make a big difference to your mean percentage scores illustrated in tables 2 and 3.

Page 2

The mean percentage score and benchmark table (table 2) illustrates your mean percentage scores for each question calculated from the data in table 1. Each score is the mean (average) score calculated from valid patient ratings (i.e. not the blank/spoilt responses) expressed as a percentage (see score calculation sheet also in the supporting document section of your report). It has been established by our statisticians that the reliability of your patient feedback for any one question may be marginally reduced if less than 25 valid patient responses is achieved (this number can be determined from table 1). In the event that there are less than 5 patient responses, the corresponding score for the question will not be illustrated.

Your scores have been displayed in colour coded boxes to indicate how your score falls within the benchmark data (within the highest 25%, the middle 50% or the lowest 25% of all the mean percentage scores achieved by all practices in the benchmark sample). The provenance of the benchmark data is provided in the footer below the table.

Graph 1 illustrates your mean percentage scores in ascending order of performance with benchmark means from all participating practices.

Page 3

Table 3 and graph 2 are the same as for page 2, but with benchmarks provided relevant to your practice list size. Evidence indicates that practices with smaller list sizes tend to perform better than those with larger list sizes.

Page 4

Table 4 shows the number of patient responses from each 'demographic' group detailed on the questionnaire i.e. age, gender, if the patient saw their usual practitioner or not and the number of years attending the practice. Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group. Associated benchmark mean scores relevant to your practice list size are also provided.

The same criteria concerning reliability of the feedback as explained in Page 2 above applies.

Page 5

Table 5 lists your current scores for each question together with scores from your last 3 surveys (if applicable) for comparison.

Page 6

Patient comments usually reflect scores achieved. The IPQ was designed to simulate the patient's chronological journey through their visit to the practice. Although the questions in the IPQ are generic, comments can pinpoint specific issues identified by the patient from any part of this journey. If there is a particular problem within the practice e.g. getting through in the morning on the telephone or the lack of chairs in the waiting room suitable for the elderly, this can be clearly picked up in the themes and frequency of comments.

In order to ensure patient anonymity, any personal identifiers are removed. In the unlikely event that we receive a written comment which might relate to serious professional misconduct (e.g. allegations of sexual assault), the comment would be referred to our Clinical Associate who would discuss the matter with you.

Improving Practice Questionnaire
